

FIRSTLOGIC® PAF MANAGER™

Firstlogic PAF Manager is a streamlined Processing Acknowledgement Form (PAF) information management system for USPS NCOALink Licensees that allows users to conveniently maintain current PAF data and documentation.

PAF MANAGER ENABLES YOU TO:

- Create a new PAF and generate a PDF ready for customer signature
- Easily see warnings on PAFs about to expire within a specified timeframe
- Renew and modify an existing PAF
- Enter Licensee information once and it will autofill when creating a new PAF
- Edit Broker/Agent or List Administrator Information
- Attach signed forms to a PAF record in the database
- Search & display PAFs
- Search a NAICS list to find the correct industry codes

PAF EXPIRATION WARNING

The application allows the user to set if a warning is shown when PAFs are about to expire and to set/change how many days from the expiration the user wants to see this warning.

LOADING ARCHIVED PAF INFORMATION AT STARTUP

The user can toggle whether to display/load archived PAF information when the application starts up.

RENEWING OR MODIFYING A PAF WITH ATTACHED FORMS

The application allows the user to select what to do with attached forms when renewing or modifying a PAF. The user can choose between the following: automatically copy all attached forms, not copy attached forms (default selection), or choose which forms to copy when a PAF is renewed or modified.

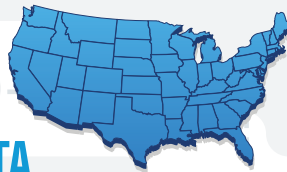

ENTERING LICENSEE INFORMATION

When the licensee information is entered, it is saved to the database and then this information is auto-populated in the "Licensee" section of each PAF form that is created.

IMPORTING NAICS DATA

The Firstlogic PAF Manager allows for the import of North American Industry Classification System (NAICS) data/codes.

EXPIRING PAF FORMS

Expired PAF forms are highlighted on the display screen.
